

Emergent Care Virtual Consult Facilitating timely access to needed specialists.

Situation

In emergency and urgent care situations, your medical staff may need immediate answers from specialists who can provide critical care decisions.

Solution

With Synzi, your staff can quickly access your network of specialists for virtual consults, on-demand, and help patients receive the care they need when they need it most.

Immediate Answers

Access your network of specialists to provide your patient with a timely assessment and diagnosis.

Convenient Consults

Enable your specialists to conveniently evaluate a patient from anywhere, at anytime, on any device.

Enhanced Satisfaction

Deliver faster and better care, reducing wait times for a critical consult while improving patient and provider satisfaction.

Delivering Critical Care in Urgent Care Situations

With a simple click, your medical staff can quickly access needed specialists and facilitate a virtual consult for faster and better delivery of care to your patients.

Efficient and Effective Consults

By providing quick access to your remote or offsite specialists, Synzi can help your medical staff facilitate a virtual consult between specialists and patients. Using our communication platform, your staff can quickly and easily conduct a video call which enables offsite specialists to connect, observe, and communicate with your patients and staff in real-time. Instead of wasting valuable minutes or hours to dial a specialist or for the specialist to be physically present for an in-person consult, your staff can facilitate a virtual consult to help obtain time-sensitive care decisions.

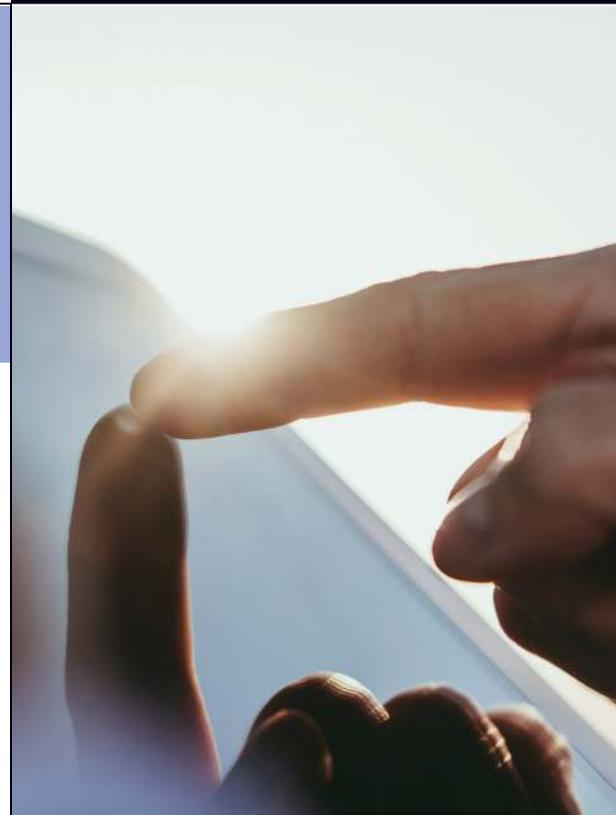

Convenient Care Delivery

Synzi can help address potential workforce gaps and the need for improved access to specialists by allowing your network of specialists the ability to communicate with your staff and “see” patients via any device, anywhere, and at any time. Your specialists will have more convenient options in terms of when and where they provide patient care. Your specialists will also have greater flexibility - and more can be available remotely - in providing virtual consults round the clock.

Intelligent Call Routing

Our solution automates and enhances your existing workflow. With our intelligent call routing, patients will be quickly connected with your first available, designated specialist who can conduct a video-based virtual consult with your patient and medical staff. As needed, one of our medically-certified interpreters can be included for improved patient engagement and outcomes amongst the LEP (Limited English Proficient) population.
