

Welcome to Synzi

A virtual care company dedicated to providing better ways for you to engage colleagues, specialists, and patients, simply and efficiently.

Synzi develops state-of-the-art solutions that make it possible for healthcare professionals to do what they do, only better.

Our communication platform can help your Home Health Care team conveniently engage your at-home patients while reducing related travel time and transportation costs. Our suite of innovative video conferencing and messaging programs leverages your existing workflows and can be configured for your specific patient populations and related touchpoint strategy. Your team and your patients can engage via any device and level of connectivity, cellular and wifi connections.

Our platform helps staff deliver virtual care, on-demand, in support of skilled and non-skilled home health care.

Better technology.

Better care.

Better outcomes.

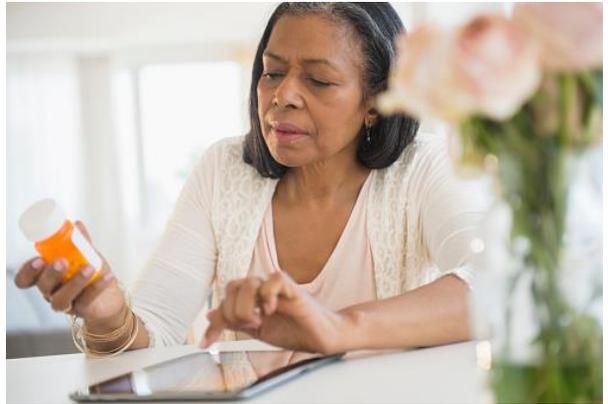

Synzi Solutions for Home Health Care

Virtual Visit

Conventional in-person visits can be supplemented with and/or substituted by virtual visits.

With Synzi, your care team can easily conduct convenient virtual visits to improve the quality and quantity of patient visits while minimizing the travel time and costs for your team.

- Expand patient access to convenient follow-up care
- Deliver timely guidance needed to reinforce understanding about the condition and the treatment plan
- Help patients transition back to independence following a hospitalization or rehabilitation
- Minimize unnecessary trips to the ER and reduce readmissions

Virtual Consult

Coordinating needed consults can be expedited with virtual consults.

With Synzi, your care team can quickly facilitate real-time virtual consults between your patients and providers to discuss prognosis while minimizing the delay in obtaining critical decisions.

- Help various providers deliver immediate, integrated care to your patients, regardless of locations
- Reduce the travel time and costs involved for the broader care team to assess patients' needs and align on expectations
- Address medication reconciliation issues in real-time to improve adherence
- Minimize unnecessary trips to the ER and reduce readmissions
