

# How Synzi is Simplifying Telehealth

Learn how our virtual care solutions are straightforward and easily accessible

Synzi's virtual care solutions are designed for your physicians and staff to quickly and easily access needed specialists in order to improve quality of care and overall satisfaction.

Because our communication platform is designed to work on regularly used devices (including smartphones and tablets), healthcare organizations will not be burdened with the need to invest in bulky and expensive carts or equipment which can be difficult to move and quickly dated.

One-Click Access for  
Improved Convenience,  
Control, and Care

Access the Right People  
Anywhere, Any Time,  
On Any Device

# Easy and Effective Access To the Right People, Right Away

---

With a simple click, your physicians, staff, patients, and additional colleagues can easily and effectively connect and communicate via video.

## Cost-effective and Convenient Communications

Physician work/life balance and patient satisfaction will be enhanced. An interpreter can also be quickly added to any conversation, improving patient engagement and outcomes, especially amongst the LEP population. Our solutions allow you to leverage existing investments in devices and staff.

## Enhanced Workflow and Improved Care Delivery

Our progression-based model will be configured to your workflow in order to leverage your patient engagement strategy and drive higher performance within your established workflows and processes. Synzi solutions can improve the timing and quality of care delivery throughout your organization.

Technology is advancing, impacting the way we live and presenting new opportunities to improve the delivery of healthcare. Synzi leverages these innovations every day, developing state-of-the-art solutions that make it possible for healthcare professionals to do what they do, only better.

We enable better performance for healthcare organizations, better access for patients, and better outcomes for all. Our goal is to continuously improve our platform and future-proof offerings that simplify complexity and inspire positive change among healthcare professionals and in the lives of patients.
