

Care Continuum Virtual Meeting

Improving collaboration
across the care team.

Situation

Enhancing the continuum of care is important to providers and patients as everyone can benefit from enhanced satisfaction, reduced costs, and improved health.

Solution

With Synzi, your team can quickly conduct a virtual meeting to discuss patient prognosis, aligning on patients' needs and expectations.

Improved Alignment

Improve coordination and collaboration across transition in treatment, providers, and facilities.

Convenient Conversations

Conduct more timely and convenient meetings, reducing travel time and costs.

Enhanced Satisfaction

Enhance the transition of care, improving patient and care team members' satisfaction.

Enhancing the Continuum of Care During Transition and Treatment

With a simple click, your care team members can communicate and collaborate on key decisions involving the transition and treatment plan of a patient via a virtual meeting.

Coordinating the Care Team

Coordinating conversations across a patient's care team is difficult with busy schedules and sprawling facilities. Synzi makes it easy to conduct a virtual meeting- essentially a video call- with all care providers regardless of location and the patient's stage in the treatment plan. Clear and open communication can take place amongst care team members and across locations.

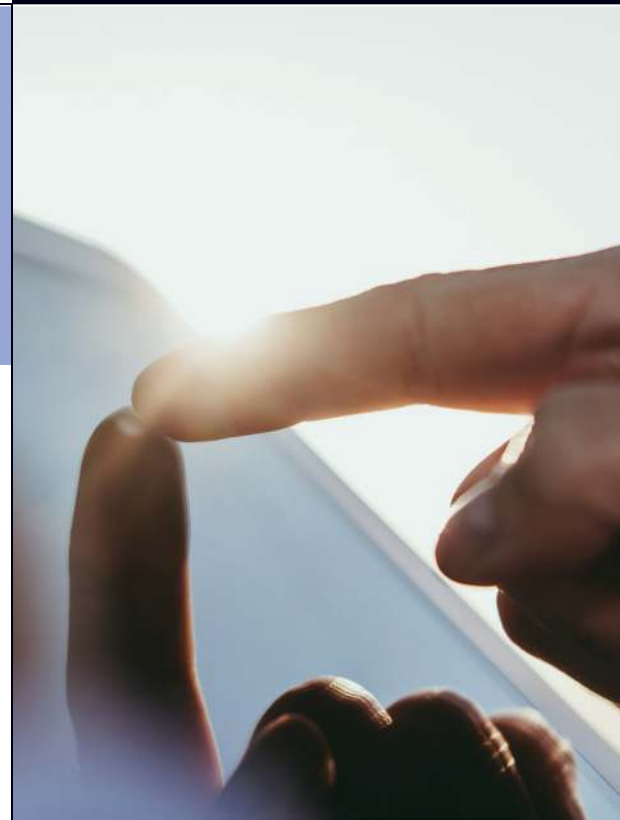

Maintaining Continuity of Care

The objective of the continuum of care is to maintain continuity of the medical care delivered to the patient at all touchpoints and at all times. When switching between care providers or care settings, maintaining the continuity of care can be critical. Enhancing a patient's continuum of care is especially vital for a patient who is more dependent on medical services whether due to age, complex conditions, behavioral issues, and/or chronic diseases.

Optimizing Care

For optimizing the continuum of care, Synzi is the high-tech answer for the high-touch delivery of patient care. Using our communication platform, your staff can easily conduct a virtual meeting to ensure that all care providers are connected, communicating, and collaborating in delivering patient-centered care across the health continuum. With Synzi, your staff can ensure that patient-centric care is the focus of all providers and institutions delivering care.
