

Award-winning HIPAA-compliant Telehealth and Virtual Care Platform

Patient engagement made easy and cost-effective

Secure Messaging

Protect ePHI with staff-to-patient and staff-to-staff secure messaging feature. Share wound pix and other patient images. Enable group communications.

Virtual Visit

Connect with patients over secure video calls to discuss progress, promote adherence, answer questions, and share guidance. Include participants such as the referring physician, a specialist, pharmacist, family caregiver, interpreter, etc.

Condition Management

Schedule a series of condition-specific texts and/or emails for your patients to receive timely, educational information about their condition(s) and well-being.

Remote Patient Monitoring

Monitor and manage at-risk patients on critical vital signs and reduce ER visits and rehospitalizations. Improve understanding of the patient's condition amongst the broader care team.

Assessments

Create and automatically distribute questionnaires to patients regarding their condition and progress. Gain insight into the patient's progress and explore if the plan of care may need to be changed. Assess staff for COVID-19 before they return back to work or visit patient homes and nursing facilities.

Everyday Devices

Leverages staff and patients' everyday devices such as smartphones, tablets and laptops

Two-Way Bidirectional Communication

Allows patients to access needed care on-demand, minimize ER visits, and lower readmissions. Also features Click-to-call which gives clinicians the ability to communicate with patients via video call (virtual visit) and Click-to-chat which enables patient-clinician communications without requiring the patient to download an application

Immediate Access to Care

Addresses the gap in care for patients in rural communities by improving access to timely care saving clinicians' travel time, expenses, and risks

Deeper Patient Engagement

Manages patients' condition and improves their quality of life. Enhances understanding by providing medically-certified interpretation and message translation in the patient's primary or preferred language

Go Beyond Traditional Telehealth with a Better Standard of Care for Your Community

Synzi's virtual care platform and HIPAA-compliant communication features help you better utilize your resources and staff while being able to provide better - more timely and higher quality - care to your patients.

- Strengthen patient engagement
- Deepen patient adherence
- Reduce the risk of rehospitalizations
- Enhance patient and staff satisfaction
- Improve impact and outcomes for all

WHO WE WORK WITH

WHO WE HELP

Connecting post-acute care partners and providers builds a virtual relationship amongst all stakeholders. Synzi streamlines the communication gap by aligning care providers on the patient's goals, updating the team on the patient's progress, and ensuring that the treatment plan is revised or an intervention is conducted based on readily available information and insights.

HOW WE ARE USED

- Welcome Message
- Wound Care
- PT, OT and SLP
- Behavioral / Mental Health
- Chronic Conditions (Diabetes, COPD, CHF, etc.)
- Pre- & Post-Op
- Palliative Care & Hospice
